### Explanation

*The PY numbers of several dinghies have changed since last year meaning that the boundary between fast and slow fleets needed adjusting otherwise the GP14s would be racing in the slow fleet. This boundary change to 1240/1239 from 1130/1129 also means that the ILCA6/Laser Radial moves to the fast fleet.*

*The old and new values for dinghies that regularly raced are listed below:*
